Dear Mr. Teague,

Thank you for your support of the **GIST CANCER RESEARCH FUND**. On behalf of the GIST community and **GCRF**, we are pleased to be apart of this special program. It is truly amazing to see how technology and innovation has impacted GIST over the last decade. Not only have new drugs been developed to treat GIST, but now companies like **Pocketstop** are using technology to raise awareness for diseases like GIST and in turn making it easier for people to donate money to fund research programs.

I'm also excited to see how text messaging can impact a future generation of donors at such an early age. This medium will not only make it easier, but it will increase awareness and help younger people get involved in the donation process.

We are very humbled by you and your Company **PocketStop** for reaching out to help raise Funds for Research for a Rare Form of Cancer like GIST. Surrounded by kind and compassionate people like yourself we will be able to help eradicate this devastating Cancer that has afflicted so many and claimed to many lives. One life lost is one life too many.

With my gratitude Tania Stutman, Gist patient and Chairperson of Gist Cancer Research Fund.
